

# Testing to the EMC Standards 2 Day Workshop

Learn & Discover

12

CPD HOURS

£995

+ VAT

Learn the basics of EMC, the EMC Directive and the principles of testing to the EMC Standards with interactive demonstrations within a UKAS Accredited test laboratory.

## Why is understanding EMC important?

---

All products should be assessed against the requirements of the EMC Directive as part of the CE marking process.

Understanding EMC, the EMC Directive and the EMC standards that your product will be tested against to assess compliance with the EMC standards is an essential part of the process of designing products.

## Who should attend?

---

The 2-day workshop is ideal for anyone involved in the design, testing and certification of electrical and electronic products.

It is also ideal for EMC test engineers and technicians as well as approvals and QA engineers.

## Key benefits of the workshop

---

- Understand the principles of EMC, EMC standards and EMC testing in a practical environment
- Get a theoretical and practical understanding of the commonly performed emissions and immunity standards
- Understand how to apply the standards to your products and how to do this in a straight forward and cost-effective manner

## The workshop programme includes:

---

- An introduction to EMC standards
- A summary of the EMC Directive
- Harmonised EMC standards and how they should be applied
- Commonly-applied emission and immunity tests
- Testing throughout the product lifecycle
- The practical application of emission and immunity testing

Learn the basics of EMC, the EMC Directive and the principles of testing to the EMC Standards with interactive demonstrations within a UKAS Accredited test laboratory.

### Book your place now to expand your knowledge

The current dates for the Testing to the EMC Standards 2 Day Workshop are available from our website or by calling our training team on **0330 430 3456**

You can also email our training team on [trainingyork@eurofins.com](mailto:trainingyork@eurofins.com) and they will be pleased to help.

#### To book your place on the Testing to the EMC Standards 2 Day Workshop:

- Call our training team on **0330 430 3456**
- Email [trainingyork@eurofins.com](mailto:trainingyork@eurofins.com)
- Download the booking form online at [bit.ly/EYSTD19](https://bit.ly/EYSTD19)
- Book & pay online at [bit.ly/EYSTD19](https://bit.ly/EYSTD19)

If you have any questions, please get in touch and we will be pleased to help.

### Extend your knowledge with our range of education, training & workshops

Alongside our Testing to the EMC Standards workshop, we offer a range of training courses and workshops that cover many areas of electromagnetic compatibility including our flagship Fundamentals of EMC events.

The current schedule includes

- Fundamentals of EMC for Products
- Fundamentals of EMC in Railways
- Fundamentals of EMC for Military
- Testing to EMC Standards
- The EMC Directive Explained
- The Radio Equipment Directive Explained
- The Low Voltage Directive Explained

To find out more about any of these courses, please call our training team on **0330 340 3456** or email [trainingyork@eurofins.com](mailto:trainingyork@eurofins.com)

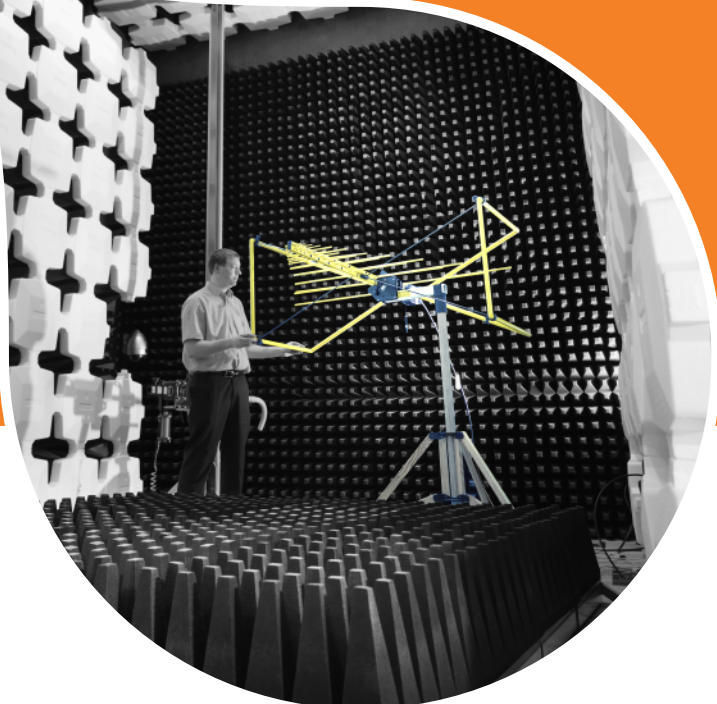

### Bespoke & In-House Training

We understand that what may suit our customers best is a bespoke or in-house training course that has been tailored to meet identified training needs or that has been written to cover a specific market, product or application.

Drawing upon both existing as well as newly created training materials, we can tailor the content, duration and technical level of a bespoke or in-house training course that will:

- Ensure the training is right for the audience
- Deliver effective training that gives the audience actionable and meaningful information
- Provide value for money to you, our customer

If you would like to find out more about bespoke or in-house training, please call our training team on **0330 340 3456** or email [trainingyork@eurofins.com](mailto:trainingyork@eurofins.com)
