

# Product Compliance Health Check

## CE Marking Confidence for Manufacturers, Importers and Distributors

Placing the CE Mark on a product is an important step for any manufacturer; signifying to the supply chain that important regulatory requirements have been met. The consequences of getting it wrong can be financially costly, and negatively impact the brand and the reputation of manufacturers, importers and distributors.

## A Flexible Solution - Tailored to Individual Needs

European legislation, in the form of the Electromagnetic Compatibility (EMC), Low Voltage (LV) and Radio Equipment Directives, contains a series of **both technical and administrative** requirements which must be satisfied before the CE marking can be applied.

The latest CE marking Directives include **enhanced market surveillance activities** across Europe and, aided by new **traceability** requirements throughout the supply chain, enable non-compliant products to be more quickly identified and removed from the market.

Directives, standards and the products themselves all change with time, meaning that a once compliant product becomes non-compliant often without the manufacturer realising.

**Our Product Compliance Health Check** is a flexible service designed to reduce risk and increase product confidence throughout the supply chain. A Health Check can include some or all of the following, depending upon an individual organisation's needs:

- A review of the technical and administrative requirements
- A check that the test standards used are still applicable and current
- Advice on changes to standards
- A review of the suitability of Technical Documentation
- Advice on ensuring on-going compliance for existing products
- A Declaration of Conformity (DoC) check for content and currency
- A traceability review

Whatever the outcome of your Health Check, Eurofins York (formerly York EMC Services) can assist in ensuring the products are compliant when placed on the market and remain so throughout their life cycle.

### Why Use the Health Check?

- Gives confidence to apply the CE marking to new products
- Provides reassurance that existing products remain compliant
- Protects the company brand and reputation
- Ensures that documentation is available for Market Surveillance Authorities
- Improves responses to requests for evidence of compliance from the supply chain

Eurofins York (formerly York EMC Services) is an organisation with over 25 years experience providing regulatory, compliance and bespoke consultancy, compliance testing, training and instrumentation. We operate from four sites across the UK which include three test laboratories accredited by the United Kingdom Accreditation Service (UKAS), near Bristol, Leeds and in Grangemouth, with our headquarters in York.

## Compliance Testing

Eurofins York is recognised as a leading provider of testing services in the UK for EMC, Radio Equipment, Electrical Safety and EMF; enabling products to readily and efficiently access the Global Market.

Our comprehensive suite of services and support ranges from pre-compliance checks through to fully UKAS accredited compliance, diagnostic and production testing. Eurofins York can therefore help you to ensure that your product meets its worldwide regulatory compliance requirements throughout its lifecycle.

## Consultancy and Research

Eurofins York prides itself on providing cost effective solutions to meet our customers' needs in the disciplines of EMC, Electrical Safety, Radio Equipment and EMF. Our company's dynamic link to the Department of Electronics at the University of York also sets us apart from other consultancy providers and test laboratories by keeping us at the forefront of developments in our field.

## Test Instrumentation

At Eurofins York we design, manufacture and distribute a range of unique noise and signal reference sources; used to verify test and measurement setups and to ensure the validity of EMC laboratory tests.

Available worldwide, our instruments are highly stable over time and their specified frequencies, ensuring that variations in your test environment are readily detected.

## York Training Academy

Eurofins York has an international reputation for providing Training Courses for individuals and organisations. Our training portfolio ranges from one day introductory courses to advanced in-depth workshops.

Available at our UK-wide locations, as bespoke in-house courses, or through on-demand online training modules to watch in your own time, we are able to accommodate you and your colleagues changing needs.
